Heath,

I performed a drive-by on the above titled project and I noticed a very LARGE concern with both Charter's and AT&T's half buried pedestal now sitting within 3ft of the newly paved path Please see the attached photos.

A couple quick questions surrounding this observation:
1. Why was no contact made to Shane or myself that these peds needed to be adjusted prior to the final grade work?
2. Who should we coordinate with in order to help us get our peds set to new grade?
Note that due to the proximity of ped and new pavement, it looks like we may have to disturb the newly paved path.

Looking forward to hearing more on this situation.

Sincerely,

Rick Podolak
