Hi Everyone,

Please review this utility application to make sure there isn't any conflicts on I-94 with installing telecom and the future pavement replacement project # 7110-05-72 that is slated for PS&E in February of 2019. Do you have a stipulation for the depth of bury for this installation? Any other concerns or comments that are not listed below?

Thank you,
Vicki

Rick,

What will be the depth of the installation of the cable/PVC under I -94? There is guardrail going north and south between the I-94 lanes and guardrail going east and west along the lanes.

There is a WisDOT pavement replacement project # 7110-05-72 slated for 2019 on STH 37/85 from I-94 to USH 12. This application will be forwarded to our utility coordinator and project manager for their review and comments.

Thank you,
Vicki
