Hello Rick,

Attached is the approved permit # 18-18-U15 in the City of Eau Claire on WIS 37. The 2018 WisDOT Supplemental Permit Provisions are attached to the permit for review.

NOTE:
Please include the permit number in all correspondence. The number can be found in the lower right-hand corner of the permit or in the subject line of the returned approved permit email.

Work Start and Completion Notices

Contact the WisDOT utility permit coordinator listed on the permit form at least three days prior to starting the work. File written (e-mail or fax) notice of completion of the permitted work and restorations within ***10 calendar days*** with the same person.

Note: The Start and Completion Notice is attached.

Note: If starting the work ahead of the work start date or if more time is needed to complete the work/restoration, contact me with the permit number, new date/s of the extension and the reason why. The updated permit will be emailed back so it can be on the work site and work can continue.

Please remember:

1.1 Permit at the Job Site
A complete copy of the permit WisDOT issues to a utility for its proposed work shall be in the possession of the utility's work force, consultant, contractor or subcontractor at all times when work is being performed within the right-of-way (R/W). This includes a copy of WisDOT's approval for a service connection under an Expedited Service Connection Permit (see HMM 09-15-20) when appropriate.

4.3 Safety Garments
All WisDOT, county, utility, consultant and contractor personnel who are out of their vehicles and within the R/W shall wear their Type 2 or 3 retro-reflective safety garments at all times.

Additional Traffic Control guidance is available through:
