Answer to question 1.
The pavement marking reference files are on the WisDOT FTP site here:

- /WisDOT-BLOOM-Vendor/Waukesha Bypass/DDE/_Template/13_Graphical Data - Reference Files/toki/HN_pm.dgn
- /WisDOT-BLOOM-Vendor/Waukesha Bypass/DDE/_Template/13_Graphical Data - Reference Files/toki/BL_pm.dgn

The pavement marking contract document sheets are on the WisDOT FTP site here:

- /WisDOT-BLOOM-Vendor/Waukesha Bypass/DDE/_Template/14_Graphical Data - Plan Sheets/toki

Instead of the cut sheets each referencing in several reference files, the PM sheets reference a common pm base file with all the references so I am attaching those in case you want them. (Toki_Sht_BL.dgn and Toki_Sht_HN.dgn)
I have also added these two files to the WisDOT FTP site here:

- /WisDOT-BLOOM-Vendor/Waukesha Bypass/DDE/_Template/13_Graphical Data - Reference Files/toki/

Reviewing the BL Metadata document I did not see the Pavement Marking, Signal and Lighting base files listed under references although the files were posted.
I have listed an additional nine references on the BL_Metadata document and attached it. The nine files added are listed as follows:

Pavement Marking:
HN_pm.dgn
BL_pm.dgn
Toki_Sht_BL.dgn
Toki_Sht_HN.dgn
Signals:
cuts.dgn
exploded_TS_Signals.dgn
LP_lighting.dgn
TS_Signals.dgn
TS_Signakls_extensions.dgn

Thanks,

Susan Cook (414) 292-4530

Subject: RE: DDE for Project 2788-00-71 US-18, Waukesha Bypass, Genessee Road to Fiddlers Creek Drive, Waukesha Co.

Hi Doug,
I reviewed the project and have a couple comments:

1. I did not find the Pavement Marking Plans that Bloom has listed on the MetaData document in the project. Please have those files submitted. (Currently, there is only one Pavement Marking file.)
2. I started to review the files from HNTB, but stopped after a couple sections. It seems that the files and the MetaData document do not match. There are files missing, extra files, etc. Please make sure that the files are placed in the correct location, and are listed in the correct location on the MetaData document.
3. Additionally, HNTB submitted their Alignments and Profiles as SDMS files. Is it possible to get these as XML files?

After the HNTB files are updated and organized, I will review their portion of the DDE submittal, and let you know if I have any additional questions or comments.

Please let me know if you have any questions or when the above items are addressed.
Thanks,
Michele

Great! Thanks! I will try to review it all this week, and let you know if I have any questions, or need anything else.

Thanks again.
Michele

I put the final meta data sheet for Bloom in the incoming folder.

The data is in the incoming projects folder with the exception of Blooms DDE form which still needs filled out. I will put it in the directory and email you when I have it. This was an Inroads design and not converted to Civil3D so the information provided is based on that. Also, HNTB did the design south of station 173 and Bloom to the north so both consultants submitted their info separately.

Subject: DDE for Project 2788-00-71 US-18, Waukesha Bypass, Genessee Road to Fiddlers Creek Drive, Waukesha Co.

Doug,

This email is your first notice to submit the Digital Data for the subject project. Please refer to \\dotwkefile1p\n3public\Pds\DDE\How To DDE for general guidance. Note the requirements for DDE for the SE Region are more stringent than the FDM.

The criteria for DDE for the SE Region is:

1. Surveyed alignment with control
2. Change in profile
3. Change in existing alignment
4. Reconstruction / Reconstruction expansion

You can upload the DDE to the following location \\dotwkefile1p\N3PUBLIC\PDS\DDE\Incoming Projects\27880071. In addition, please submit the Contractor Staking Packet. If your project has multiple ID's the lower one will control the submission. After submission, the projects will be moved to the read-only folder \\dotwkefile1p\n3public\PDS\DDE\Filed\ and be available for future use.

Please have your in-house design staff prepare the submission or your consultant submit the required data per their contract.

Do Not place a copy of the C3D folder into the DDE folder. The DDE is smaller and requires a different folder organization in addition to the Metadata form to identify forms.

The deadline for submission is Friday 7/27/2018.

Please contact me with any questions or concerns.

Thank you,
