Percent Mobilization by Improvement Strategies

2014 -2018

The following tables summarize the mobilization according to improvement strategies based on five years of data from January 2014 to December 2018. The tables are separated by improvement strategies for bridge and roadway proposals. The improvement strategies are classified in [FDM 11-1, Attachment 10.1](#).

The tables below include all projects of varying sizes for each improvement strategy. Expected values do vary depending upon the amount spent on the project. Small and large projects typically will have higher mobilization costs than mid-size projects. Expected Range and Typical Middle Value is defined in the Appendix.

The [Similar Projects Tool](#) allows the sorting of 5 years of data by a number of criteria including improvement type, region, project size and date of the project. The similar projects tool can be found on the [Estimating Tools Page](#).
