

UTILITY WORKSHEET

DT2236 06/2009 s.84.063 Wis. Stats.

Wisconsin Department of Transportation

Utility Company Name We Energies Electric	PLEASE RETURN THIS WORKSHEET BY November 20, 2018
Project Description – Include Project ID, Title, Subtitle, Highway, County Design Project: ID: 6590-02-05 Construction Project ID: 6590-02-75 WAUPACA - CLINTONVILLE WCL RR BRIDGE – STH 110S STH 22, Waupaca County	RETURN TO John Beckfield CBS Squared, Inc. 770 Technology Way Chippewa Falls, WI 54729 jbeckfield@cbssquaredinc.com

1. Describe your proposed relocation plan for the above project, as requested in the enclosed letter, using highway stationing whenever possible. Attach extra sheets if needed.

We Energies – Electric no conflict work plan WR4294260, listed below is based on project plans dated 09-21-2018.

We Energies has poles, 12KV overhead conductors located between sta. 265+00 to the end of the project sta 332+17. The remainder of the project is outside of We Energies Electric service territory. We Energies Electric will not be relocating any facilities.

Any facilities not explicitly identified as being relocated have been deemed to be not in conflict and will remain in place as is. It is expected that contractors will work safely around any facilities left within the work-zone. If plans change such that facilities become in conflict, it is expected that will the highway contractor will work with We-energies to resolve said conflict.

2. Conflicting utility facilities will need to be relocated prior to construction. If this is not feasible, provide an explanation and an indication of what work will require coordination with the highway contractor during construction.

Not Applicable (NA)

3.	Anticipated Start Date NA
4.	Estimated construction time required (In working days) NA

5. List the approvals required and the expected time schedule to obtain those approvals.

NA

6. Include a list of the real estate parcels that the Wisconsin Department of Transportation (DOT) must have acquired to enable your company to complete the necessary facility installations and relocations prior to construction.

NA

7. Review the enclosed plans for the above project. Are your facilities correct as shown? If not, list the errors. In some cases, it may be easier to return a marked up copy of the plan. **It is very important that your facilities are shown correctly because all construction field personnel will use this information. Uncorrected location errors could create construction delays or damage to utility facilities.**

We Energies - Electric facilities are shown correctly on plans.

8. Is this work dependent on work by other utilities? If so, which other utilities, and what time schedule has been coordinated with them?

NA

9. Please provide the name, address, and telephone number of the field contact person for this project, so that we may place this information on the highway plan.

Kenneth J. Van Oss

Address

800 S. Lynndale Dr.

City, State, ZIP Code

Appleton, WI 54912

Area Code - Telephone Number

920-380-3318

Area Code - Telephone Number (Mobile)

10. List any other relevant information that may impact the ultimate goal of preventing construction delay due to uncertain scheduling of utility facility relocations.

No conflict work plan was determined based on cross sections shown on project plans. If more extensive EBS work is found to be required during road construction, the road contractor will inform We-energies of the change in plans and work to resolve the conflict in an agreeable manner.

WisDOT staff are responsible to request any new services (recommended 30 days prior to let date) and the owner of record is required to request any disconnections of existing services through the We Energies Contact Center at 800-242-9137.

11. Yes No
- ☐ ☒ Do you have any facilities that are no longer in use but have been left in place in the project area? If "Yes", approximately where are the facilities located and what type and size of facility is involved?
-
- ☐ ☒ Does the line have any remaining product?
- ☐ ☒ Does the line have any asbestos wrap or any other hazardous materials associated with it?
- ☐ ☒ Does any part of the line conflict directly with the proposed highway project? If so, what arrangements have been made to remove those portions? This should be mentioned as part of your work plan in question number 1 on this form.
-

Is there any reason the highway contractor cannot remove portions of the line left in place?

It is imperative that the highway contractor contact We Energies before removing any gas facilities or electrical underground cables, to verify that they have been discontinued and carry no natural gas or electrical current. The contractor must not assume that unmarked facilities have been discontinued. At no time is it acceptable to push, pull, cut or drill an unmarked facility without explicit consent from We Energies. Contractor must call the We Energies 24 hour Dispatch lines to arrange for this verification.

We Energies Electric Dispatch #1-800-662-4797

We Energies Gas Dispatch #1-800-261-5325

If the above boxes regarding hazardous material or remaining product are checked "No" AND the line has been verified by We Energies to be dead per the above paragraph, it is the responsibility of the road contractor to remove and dispose of all sections of the discontinued facility necessary for them to continue with the project.

If you answered "Yes" to any of the questions above, please provide us with additional information. Attach additional pages if necessary.
