EXECUTIVE SUMMARY

The WisDOT is preparing to replace the deck for the West Good Hope Road east/west structures and potentially widen the West Good Hope Road westbound structure over STH 145. In addition, the North 107th Street structure is planned to be removed and replaced. Both structures are located in Milwaukee, Milwaukee County, WI (WisDOT ID 1360-12-00). The project's PS&E date is scheduled for May 1, 2020.

OBG completed a Phase 1 HMA in accordance with the WisDOT's FDM Chapter 21, Section 35, Part 5 (21-35-5), on behalf of the internal WisDOT design team. The Phase 1 HMA findings and recommendations are summarized in Table 1. Based on the findings of the Phase 1 HMA, no additional hazardous materials investigation and no hazardous materials special provisions are recommended for this project. If construction or real estate requirements change, evaluation of need for further investigation will be necessary.

1 PROJECT INFORMATION

1.1 GENERAL INFORMATION

The WisDOT is preparing to replace the deck for the West Good Hope Road east/west structures and potentially widen the West Good Hope Road westbound structure over STH 145. In addition, the North 107th Street structure is planned to be removed and replaced. Both structures are located in Milwaukee, Milwaukee County, WI (WisDOT ID 1360-12-00). Figure 1 shows the project location. The planned project area is primarily residential and commercial. Historic land use in the area is mostly agricultural and residential. The project's PS&E date is scheduled for May 1, 2020.

1.2 METHODOLOGY

OBG completed the Phase 1 HMA in accordance with the WisDOT's FDM Chapter 21, Section 35, Part 5 (21-35-5) (revised December 22, 2011), on behalf of the internal WisDOT design team. Specifically, the following were reviewed as part of this Phase 1 HMA to determine the likelihood of hazardous materials being present within the project limits.

- WDNR BRRTS Sites Map was reviewed to identify documented release sites that are relatively close to the project, and to obtain information for such sites (*e.g.*, GIS Registries). The Sites Map lists known releases of petroleum products, other contaminants (*e.g.*, chlorinated solvents, metals, PCBs, agricultural products), and lists information for documented historic fill sites.
- DATCP Registered Storage Tank on-line database was reviewed for the addresses immediately adjacent to the project.
- WDNR's list of Licensed Solid Waste Landfills.
- Online sources for Superfund and Superfund alternative sites.
- WisDOT historical plan sets.
- Aerial photographs obtained from the Milwaukee County online interactive mapping website (1928 2015).
- Topographic maps provided by the United States Geological Survey (1958-1994).
- WDNR and WGNHS Well Constructor Reports.
- DATCP Agrichemical Spills.

OBG utilized the services of HIG to provide Sanborn fire insurance maps, city directories, and to review environmental databases. Appendix A contains documentation that no Sanborn maps were found and other historical information. Appendix B contains HIG's environmental database review report. OBG did not find any documented agricultural chemical releases within or near the planned project limits.

OBG conducted field reconnaissance of the project limits on January 19, 2018. Photographs are provided in Appendix C. No groundwater monitoring wells or railroad crossings were observed within the planned project limits.

1.3 HYDROGEOLOGY

Based upon review of water supply well construction reports obtained online from the WGNHS, near surface soils consist of clay and gravel underlain by limestone. The depth to groundwater ranges from approximately 30 to 70 feet below ground surface. The relatively shallow planned excavation depths for the project are less than the documented groundwater table in the area. As such, excavation dewatering for this proposed project will likely either not be required or will be minimal.

1.4 FINDINGS

Table 1 summarizes the Phase 1 HMA information for each of the potential hazardous material sites that are located near the project limits, and summarizes the significant findings from each of the above data sources, as applicable. The bridge structures are shown on Figure 2 and sites identified as potential hazardous materials concerns for the project are shown on Figure 3.

Milwaukee Meto Center (10953-10955 W Fond Du Lac)

This property is located approximately 550 feet west of the North 107th Street structure and is currently a vacant lot. Review of historical information indicates that this property has always been vacant. The property is classified as an inactive waste generator. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Griffin Chevrolet (11100 W Metro Auto Mall)

This property is located approximately 600 feet south of the West Good Hope Road EB/WB structures and is currently occupied by an auto dealership. Review of historical information indicates that this property has been developed with the present day structure since at least 2005. The property is classified as a RCRA-CESQG, meaning it generates 100 kg or less of hazardous waste per calendar month. Based on the database report, the property has not received notices of violations related to RCRA activity. The SHWIMS and WDS listings appear to be related to the RCRA-CESQG facility listing. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Bergstrom Chevrolet (11200 W Metro Auto Mall)

This property is located approximately 650 feet southwest of the West Good Hope Road EB/WB structures and is currently occupied by an auto dealership. Review of historical information indicates that this property has been developed with the present day structure since at least 2015. One 1,000-gallon new oil AST, one 500-gallon new oil AST, and one 7,000-gallon waste/used motor oil AST are listed as being in use at this property. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Bergstrom Hummer of Milwaukee (11330 W Metro Auto Mall)

This property is located approximately 750 feet southwest of the West Good Hope Road EB/WB structures and is currently occupied by an auto dealership. Review of historical information indicates that this property has been developed with the present day structure since at least 2005. One 650-gallon waste/used motor oil AST is listed as being in use at this property. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Bergstrom Nano Cars Inc (11340 W Metro Auto Mall)

This property is located approximately 750 feet southwest of the West Good Hope Road EB/WB structures and is currently occupied by an auto dealership. Review of historical information indicates that this property has been developed with the present day structure since at least 2005. Two 250-gallon new oil AST and one 250-gallon waste/used motor oil AST are listed as being in use at this property. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products

and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Harold Rochol (7120 N 107th St)

This property is located approximately 750 feet north of the North 107th Street structure and is currently a residence. Review of historical information indicates that this property has been developed since at least 1963. One 1,000-gallon fuel oil UST is listed as being closed/removed from this property as of August 13, 1995. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Infosys (10850 W Park Pl)

This property is located approximately 1,000 feet northeast of the West Good Hope Road EB/WB structures and is currently occupied by an office building. Review of historical information indicates that this property has been developed with the present day structure since at least 1995. One double-walled 147-gallon diesel fuel AST is listed as being in use at this property. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

WI DOT ROW (Hwy Sign) (USH 45, North of Good Hope Rd)

This property is located approximately 1,050 feet northwest of the West Good Hope Road EB/WB structures and is currently highway right-of-way. Review of historical information indicates that his property has been highway right-of-way since at least 1963. An ERP case (BRRTS Activity No. 02-41-001077) was opened for this property on June 14, 1994 due to reported soil petroleum contamination. Review of the WDNR online information for this ERP case, which was closed on January 25, 2005, did not identify off-site soil contamination migration. In addition, no groundwater contamination was identified. Based on review of the available information and distance from the project site, this property is not considered a concern to the WisDOT project.

Carmen Falson (10501 W Good Hope Rd)

This property is located approximately 1,100 feet northeast of the North 107th Street structure and is currently a residence. Review of historical information indicates that this property has been developed since at least 1951. One 550-gallon fuel oil UST is listed as being closed/removed from this property as of June 3, 1993. In addition, one 550-gallon fuel oil UST is listed as being in use at this property. This property was not identified in the regulatory agency database records used to track reported significant spills/releases of petroleum products and/or hazardous substances. Based on review of the available information and distance from the site, this property is not considered a concern to the WisDOT project.

Remaining Facilities

OBG | JANUARY 26, 2018

The remaining facilities listed in the database report do not appear to represent recognized environmental conditions for the project limits based upon regulatory status, apparent topographic gradient, and/or relative distance from the project limits.

2 CONCLUSIONS AND RECOMMENDATIONS

No sites were identified as potential sources of contamination to the planned West Good Hope Road and North 107th Street structures over STH 145 project limits. No additional hazardous materials investigation and no hazardous materials special provisions are recommended. Relevant and concise summary information from the data sources listed in Section 1.2 above are included in Table 1 and the appendices, including a completed WisDOT Phase 1 Assessment Site Summary for each evaluated site (see Appendices D through L). If construction or real estate requirements change, evaluation of need for further investigation will be necessary.

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The WI-ESR is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The WI-ESR is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HYDROLOGIC UNIT Hydrologic Unit Maps USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Release 2.6.3 | 09/28/2017 | Release Notes

Appendix L Carmen Falson

WisDOT Phase 1 Hazardous Materials Assessment Site Summary

(rev. 11/11/2011)

WisDOT Project ID: 1360-12-00

Highway/Street: W Good Hope Rd and N 107th St Structures over STH

145

Termini/Limits: W Good Hope Rd and N 107th St Structures over STH

145

County: Milwaukee

- Journal of the state of the s	Will Walker	
Property Information: Site Name(s): DOT parcel number (if known): Property Address:	Carmen Falson 10501 W Good Hope Rd Milwaukee, Wisconsin	
Owner's Name: Owner's Address: Owner's Phone: Current Land Use: Past Land Use:	Robert and Carmen Falson 10501 W Good Hope Rd Not Provided Residence Residence	
Real Estate Requirements: None Total take Strip accommodate Temporary Limited Easement Permanent Limited Easement Other (describe)	(TLE)	
Construction Requirements: № □ Excavation within current righ □ Excavation within proposed ri □ Excavation within easement to □ Public or private utility or sani	nt of way to feet ight of way to feet	
☐ Kerosene ☐ U ☐ site is a DSPS adminis	ssional Services (DSPS) nks	
Department of Natural Resources site is a DNR administ site is a DNR administ site is a closed LUS site is a landfill site is an abandoned site is a hazardous wa	es (DNR) stered LUST site; BRRTS number: stered ERP site; BRRTS number: ST	
WisDOT historic plan sets: site is Business directories: Residence Comments: One 550-gallon fuel	on map dated . Comments: No Coverage s a on project dated . Comments:	of

A check in a checkbox indicates a positive or "yes" response. Aerial photos: 1928-2015 Comments: Contamination discovered at feet during utility or other excavation in the area. Indicate location on site map. Interview Information or other comments: Visual Evidence of Potential Contamination: (include additional information in space provided) ☐ No evidence of tanks ☐ USTs ☐ ASTs - Location, number and condition of tanks, contents, comments: Location in relationship to current right of way: map attached Location in relationship to proposed right of way: map attached ☐ Drums ☐ Stained soils ☐ Odor ☐ Sheen on surface water ☐ Areas of excavation ☐ Areas of fill ☐ Stressed vegetation ☐ Pond(s) ☐ Basins/sumps ☐ Monitoring wells Soil borings Comments: Potential for Contaminant Migration: (attach supporting documentation such as plume maps, summaries of site investigation or closure reports). Property is a potential source of contamination Adjacent property is a potential source of contamination. Include site name or BRRTS number if known, describe location, include contaminant type and any additional information. Contaminated soil known to be within proposed right of way from feet to feet below ground surface Contaminated groundwater known to be within proposed right of way at feet below ground surface. Contaminated soil or groundwater within existing right of way. Attach copy of most recent investigation and plume maps. Attachments - required Site photographs and a site map showing areas of concern Plat map showing parcel and any proposed areas of acquisition or easement ☐ Historic aerial photos of site - clearly outline site Historic WisDOT or other as-builts and plat maps - clearly outline site Plume maps for known contamination. Indicate existing or proposed right of way where applicable. Recommendations No additional hazardous materials investigation is required. If construction or real estate requirements change, evaluation of need for further investigation will be necessary. ☐ Information is sufficient to use Standard Special Provisions. Copy of completed Standard Special Provision is attached. ☐ Conduct additional investigation Phase 2 (determine if contamination is present) Phase 2.5 (determine extent of contamination within existing R/W only) Phase 3 (determine full extent of contamination prior to acquisition) ☐ Phase 4 (remediate site) Other (describe) Prepared by: Andrew Cawrse of OBG Recommendations accepted by (name and title): on Signature:

A check in a checkbox indicates a positive or "yes" response.
