TRANS 220 PROJECT
PROJECT PLAN TRANSMITTAL
WORK PLAN

RE: Design Project ID: 1410-00-03
Construction Project ID: 1410-00-73
WEST BEND TO NEWBURG, T OF TRENTON
1/2 MI WEST OF N POPLAR RD TO CTH Y
STH 33, WASHINGTON COUNTY

The information in this letter is meant to satisfy the legal requirements of Wisconsin Statute 84.063 and Administrative Rule Trans 220.

1. **Please complete and return the Project Plan Acknowledgement portion of the DT1078, *Project Plan Transmittal* form within seven days of your receiving it.**
2. **Within 60 days you'll need to submit a work plan to describe what relocations will be required by this project. WisDOT form DT2236, *Utility Worksheet*, is enclosed to help you develop a complete work plan.**

Within the limits of this project, your company has facilities, some of which may be in conflict with this proposed project. The final responsibility for conflict identification lies with you.

The plan should show both the present affected facility and the relocated or replacement facility with ties to highway stationing so that the location can be readily identified.

Remember that in fill sections and in transitions between cuts and fills, it is common for cuts from 6" to 18" to occur when removing the existing pavement or topsoil, before the fill is added. Further, pay particular attention to ditch cuts; culvert, end wall, and cattle pass replacements and extensions; and driveway construction. All of these seemingly minor operations can affect your facilities in major ways.

Enclosed are the following:

1. **DT1078, *Project Plan Transmittal*. Must be returned within seven days.**
2. An approved Trans 220 project plan for design of utility facility alterations or relocations.
3. **DT2236, *Utility Worksheet*.**
4. Project synopsis that describes the work to be done and includes a list of environmentally sensitive areas.
 - a. The work under this contract shall consist of 3" milling, 4" asphalt pavement overlay and other incidental work, including: curb ramps, curb and gutter replacement, flumes, culvert cleaning, signing, pavement marking, retaining wall maintenance and repairs, erosion control, restoration, traffic control, and all incidental items necessary to complete the work as shown on the plans and included in the proposal and contract.
 - b. Environmentally sensitive areas include the areas adjacent to the Milwaukee River, and any other wetland areas adjacent to the project.

5. A map showing the general location of this project. This project is located in:
Sections 12, 13 of Town 11 North, Range 20 East, Ozaukee County.
Sections 09, 10, 11, 12, 13, 14, 15, 16 of Town 11 North, Range 20 East, Washington County.
Sections 07 of Town 11 North, Range 21 East, Washington County.
Sections 07 of Town 11 North, Range 21 East, Ozaukee County.
6. List of possible conflicts below.
 - a. Possible conflicts have been identified at Anne Street and STH 33 in the village of Newburg, WI. New curb ramps will be constructed at this location.
7. List of utility facility owner contacts. This list may help you coordinate any relocation work with other utility owners.

DEADLINES: As stated on the DT1078, please submit the enclosed DT2236, *Utility Worksheet* and sketches by **1/12/2024**. This project's design complete date is November 1, 2024, with a construction bid letting scheduled for February 11, 2025.

I would like to thank you in advance for your cooperation and assistance in our project development efforts. If you have any questions about this project, please contact me.
