John – I reviewed the reports. Appears that loose gravel may have been contributing factor in at least the 1st accident. At this point, Sia is confident that we do not have adverse conditions in place.

W/regards to recovery by anyone involved in a crash, that would have to be through the prime contractor. If the Village receives any inquiry from those involved, you can direct those calls to me.

I was aware of the 1st accident but was waiting for the report. Sia has indicated that roadway has been swept – now multiple times. Department is concerned that we do not have any deficiencies in surface conditions.

The information I've been provided indicated that sweeping and removal of any loose stones was completed prior to opening to traffic but that potentially some aggregate became loose and accumulated during the day. Our standard specs capture that the contractor is responsible for roadway maintenance and traffic control including properly safeguarding public travel.

Do not want to provide any pre-judgment w/out information. The second accident happened more than a week after placement – meaning traffic had been successfully navigating the curve in the road. Would like to see the police report to understand conditions and potential cause.

Sia,

What is the status of Fahrner completing another sweep / vacuum of the pavement? Kurt, what are your comments on these accidents? Village staff and elected officials are very concerned about this matter.

Julie,

Thank you for forwarding this message. I have copied John, Chief Young and Attorney Jaekels as well.

Chief, is there an accident report available for this incident?

Paul

Subject: Serious Hazard on Lake Drive

Dear Ms. Siegel,

While driving my Vespa scooter south on Lake Drive yesterday at around 4 pm my vehicle began to hydroplane into oncoming traffic. I wound up flying off the scooter and my body skidding along the surface of the road. I was taken to St. Mary's emergency room where my multiple wounds were treated for four hours. I have since learned that the Village has applied some kind of powder to Lake Drive and has been warned that it makes the surface of the road hazardous to bicycles. I hope you will look into this matter and have the material removed immediately before anyone else is injured and possibly killed. Thank you for your attention.

Sincerely,

Frances Assa
