Trans 220 Work Plan Approval

Dan Sande
We Energies – Gas
333 W. Everett Street - A299
Milwaukee, WI 53203

SUBJECT: Zoo IC, Detention Pond
At North Avenue Interchange
Non Hwy
Milwaukee County
Project 1060-34-78
Parcel: N/A
Utility ID: N/A

Dear Mr. Sande:

This letter is to advise you that we have received your proposed Work Plan for the subject project and have found it to be in conformance with Chapter TRANS 220 of the Wisconsin State Statutes.

The utility special provisions in the contract documents are based on your approved work plan. If you make any change to your proposed work plan, please contact me so I can revise the contract documents as necessary.

It is my understanding that no relocation of We Energies - Gas facilities is required for Project 1060-34-78. The anticipated let date for this contract is January 9, 2018. The anticipated start of construction is March 1, 2018.

If you have any questions, please call me.

Respectfully,

Margaret Liedtke

Recommendation for Work Plan Approval

Zoo IC, Detention Pond
At North Ave Interchange
Non Hwy
Milwaukee County
Project 1060-34-78

We Energies - Gas
Parcel: N/A
Utility ID: N/A

Dear Ms. Liedtke,

Enclosed please find a copy of a utility worksheet for We Energies - Gas facilities for the above noted project.

I have reviewed the utility worksheet for conformity with the project plans and hereby recommend its approval. Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to be "Kevin Cornell", written over a horizontal line. The signature is stylized with a large loop at the end.

Kevin Cornell, PE, PLS
Utility Coordinator, Forward 45

UTILITY WORKSHEET

DT2236 07/2016 s.84.063 Wis. Stats.

Wisconsin Department of Transportation

Utility Company Name We Energies Gas	PLEASE RETURN THIS WORKSHEET BY Feb 19, 2017
Project Description – Include Project ID, Title, Subtitle, Highway, County Project: I.D. 1060-34-78 Project Location: W. North Ave. interchange with Zoo Freeway County: Milwaukee	RETURN TO Kevin Cornnell Forward 45, LLC Email : KCornnell@HNTB.com

1. Describe your proposed relocation plan for the above project, as requested in the enclosed letter, using highway stationing whenever possible. Attach extra sheets if needed.

We Energies - Gas relocation plan listed below is based on project plans dated 12-21-2016.

Relocations and adjustments of We Energies facilities will be constructed per existing WR 3932486 on W. North Ave. as part of WisDOT project 1060-34-77 for the Zoo IC project.

Highway stationing has been used where possible to locate new facilities. See previously submitted CAD alignment for the 12" ST gas relocation under WR 3932486. See the attached preliminary design for WR 3932486.

Any facilities not explicitly identified as being relocated have been deemed to be not in conflict and will remain in place as is. It is expected that contractors will work safely around any facilities left within the work-zone. If plans change such that facilities become in conflict, it is expected that will work wit We-energies to resolve said conflict.

2. Conflicting utility facilities will need to be relocated prior to construction. If this is not feasible, provide an explanation and an indication of what work will require coordination with the highway contractor during construction.

We Energies plans to relocate its facilities prior to the start of road construction, dependent on the conditions specified in this work plan and attached design.

All discontinued facilities are annotated on the design drawing and will be left in place.

3.

Anticipated Start Date 05/2017

4.

Estimated construction time required (In working days) 75 working days.

5. List the approvals required and the expected time schedule to obtain those approvals.

* DOT Work Plan Approval/Compensable Agreement/Start Work Notice issued 30 days prior to anticipated start date.

* State DOT permit.

* County and municipal permits if applicable.

* Acceptance by adjacent property owners of the proposed locations of new gas facilities.

* Signed easements from property owners where required by We Energies.

* DNR & Army Corp of Engineers permits, if required.

* Erosion Control permits and shoreland zoning approvals as required.

6. Include a list of the real estate parcels that the Wisconsin Department of Transportation (DOT) must have acquired to enable your company to complete the necessary facility installations and relocations prior to construction.

All parcels must be acquired, list the parcels that are needed

These parcels must be obtained at least 30 days prior to the start date listed in section 3. This work plan may need to be revised and possibly adjusted to include a new start date and estimated construction schedule if this requirement is not met.

DOT must provide real estate commitments for listed parcels and dates parcels were obtained.

7. Review the enclosed plans for the above project. Are your facilities correct as shown? If not, list the errors. In some cases, it may be easier to return a marked up copy of the plan. **It is very important that your facilities are shown correctly because all construction field personnel will use this information. Uncorrected location errors could create construction delays or damage to utility facilities.**

We Energies - Gas facilities appear to be shown correctly.

8. Is this work dependent on work by other utilities? If so, which other utilities, and what time schedule has been coordinated with them?

NA

9. Please provide the name, address, and telephone number of the field contact person for this project, so that we may place this information on the highway plan.

Name

Paul Osmanski

Address

500 S. 116th St.

City, State, ZIP Code

West Allis, WI 53214

Area Code - Telephone Number

Area Code - Telephone Number (Mobile)

414-315-1278

10. List any other relevant information that may impact the ultimate goal of preventing construction delay due to uncertain scheduling of utility facility relocations.

We Energies requests WisDOT survey a reference line for utilities use. Please contact We Energies when reference line survey is scheduled.

Estimated time required in section 4 was calculated assuming typical weather conditions. If weather conditions are more severe than normal, more time may be required. If more time is required, the DOT Utility Coordinator will be made aware of the situation as soon as possible.

The proposed relocations and schedules listed in this Work Plan may have to be revised if any unknown environmental conditions are encountered within any areas where We Energies is planning to perform work. Coordination with the DOT and/or the road contractor may be required if this occurs.

Relocation plans were determined based on cross sections shown on project plans. If more extensive EBS work is found to be required during road construction, the road contractor will inform We-energies of the change in plans and work to resolve the conflict in an agreeable manner.

If utilities were not considered in WisDOT's Traffic mitigation plan the relocations and schedule described above may be affected and revisions to this work plan may be necessary. If lighting and signal plans were not made available prior to submission of this work plan revisions may be necessary.

WisDOT staff are responsible to request any new services (recommended 30 days prior to let date) and the owner of record is required to request any disconnections of existing services through the We Energies Contact Center at 800-242-9137.

If the contingencies listed in sections 5, 6, & 10 cannot be met 30 days prior to the anticipated start date, We Energies will be forced to adjust the start date which could require relocations be done during road construction.

11. Yes No
- X ☐ Do you have any facilities that are no longer in use but have been left in place in the project area? If "Yes", approximately where are the facilities located and what type and size of facility is involved?
-
- ☐ X Does the line have any remaining product?
- ☐ X Does the line have any asbestos wrap or any other hazardous materials associated with it?
- ☐ X Does any part of the line conflict directly with the proposed highway project? If so, what arrangements have been made to remove those portions? This should be mentioned as part of your work plan in question number 1 on this form.
-

X Is there any reason the highway contractor cannot remove portions of the line left in place?

It is imperative that the highway contractor contact We Energies before removing any gas facilities or electrical underground cables, to verify that they have been discontinued and carry no natural gas or electrical current. The contractor must not assume that unmarked facilities have been discontinued. At no time is it acceptable to push, pull, cut or drill an unmarked facility without explicit consent from We Energies. Contractor must call the We Energies 24 hour Dispatch lines to arrange for this verification.

We Energies Electric Dispatch #1-800-662-4797

We Energies Gas Dispatch #1-800-261-5325

If the above boxes regarding hazardous material or remaining product are checked "No" AND the line has been verified by We Energies to be dead per the above paragraph, it is the responsibility of the road contractor to remove and dispose of all sections of the discontinued facility necessary for them to continue with the project.

If you answered "Yes" to any of the questions above, please provide us with additional information. Attach additional pages if necessary.
