Additional Information

Elaborate on other concerns such as: DNR, Local, Utility Conflicts, Aesthetics, Railing Type and Staged Construction.
Please be as detailed and specific as possible.

WisDOT SE Region advanced Let from 9/2021 to 5/2020 and is developing the roadway plans.

Item #10: Deck repairs and polymer overlay to be done during short term (e.g. overnight or weekend) lane closures. At the end of each work zone closure, the bridge deck must be suitable for opening to traffic. The contractor should not beign work that cannot be completed within the closure period.

Item #12: Quantities for Deck Preparation Type 1 and Type 2 and Full Depth Deck Repair to be determined in final design. Quantities for superstructure Concrete Surface Repair will be included in final plan submittal.

Item #13, 14, 15: These values were taken from the HSI system on 12/19/2016.

Item #16: Utilities on B-40-377. Per the existing plans the structure has 1-2" diameter conduit in the east and west parapets.

Item #18: No drains on the structure.

Item #21: Based upon the most recent inspection report dated April 17, 2018 the following deficines are noted:
-Repair settled sidewalk at approaches - near school, high pedestrian traffic (not on the bridge, roadway item).

Item #22: No asbestos containing material (ACM) was idetified on the existing structure per the Bridge Asbestos Inspection Report dated June 21, 2016. Standard Special Provision (STSP) 107-125 should be included in the specifications.

Other:
Related roadway work at the approaches will be included in roadway plans.

The concrete deck should be repaired as necessary per item "deck preparation", with "concrete masonry deck repair". See B-40-377_oth file for maintenance items.
